- **Backend**: Java, Spring Boot, REST APIs, Node.js
- **Database**: MySQL, MongoDB
- **Tools & Platforms**: Git, GitHub, Bitbucket,VS Code, Postman, JIRA, Azure Devops.
- **Other Skills**: JWT Authentication, Redux Toolkit, Agile, CI/CD (basic), JSON, etc.

WORK EXPERIENCE

Company Name - Valt Technology, Pune

Position- Java Full Stack Developer

Work Period- May 2024 - Present

- Developed and maintained key features for Test Engine and Agiconnect platforms
- Built modular React components integrated with secure REST APIs using Spring Boot
- Implemented state management using Redux Toolkit and secure role-based access
- Worked closely with UI/UX teams and participated in Agile sprints and daily standups
- Contributed to token-based workflows and dynamic registration/user access systems

PROJECT EXPERIENCE

Test Engine – React, Node.js, Redux, MySQL

Role - React Developer

A full-featured online test platform for conducting technical assessments with real-time evaluation and proctoring.

- Developed a multi-step test creation UI with tab-based flow for test details, sections, and settings
- Integrated Monaco Editor with language/theme switching and test case configuration
- Built dynamic components using React and Redux for test flow logic and validation
- Implemented token-based UI flows for invited and registered user access
- Created UI features for proctoring: tab-switch alerts, fullscreen exit warnings, auto submission
- Collaborated with backend and QA teams for seamless API integration

Agriconnect – Spring Boot, React.js, MySQL

Role - fullstack Developer

AgriConnect is a full-stack AgriTech platform enabling farmers and buyers to connect, collaborate, and access agricultural services with multilingual support.

- Developed frontend in React for dashboards, listings, and expert sessions
- Integrated backend APIs using Spring Boot for managing crops, communities, and feedback.
- Integrated AWS Translate for localization in Marathi, Hindi, and English
- Enabled community modules with group creation, posts, and interaction tracking
- Contributed to crop modules and medicine recommendation features
- Participated in API testing, sprints, and maintained Git-based version control
